Role Summary

B.Tech Computer Science and Engineering student with hands-on experience in software design, development, testing, debugging, database development, REST API development and application maintenance. Experienced with Python, JavaScript, SQL, PL/SQL, Oracle Database, Flask, Git and Power BI. Built full-stack applications, database-driven systems, REST APIs, analytics dashboards and AI-enabled applications, including an Airline Operation Suite with 43 REST endpoints and 82 PL/SQL stored procedures. Strong foundation in problem solving, software development, database management, API integration, authentication and deployment, with an interest in contributing to client software solutions under the guidance of senior engineers.

Education

KMBB College of Engineering and Technology, Khordha *2023 – 2027*
B.Tech in Computer Science and Engineering — CGPA: 7.9 / 10

Oneness International School, Khordha *2023*
12th - CBSE — Percentage: 61%

Mount Litera Zee School, Tangi *2021*
10th - CBSE — Percentage: 71%

Projects

Airline Operation Suite (AOS) | Flask, Oracle, PL/SQL, RAG *Apr 2026 – Aug 2026*

- Designed an airline operations platform using an Oracle database with 18 tables, 15 sequences and 82 PL/SQL stored procedures.
- Developed 43 REST API endpoints for flight search, dynamic pricing, seat booking, ticketing, payments and role-based access control.
- Implemented transactional seat booking with availability validation, fare calculation, PNR generation and rollback handling.
- Built a RAG travel assistant using LangChain, ChromaDB, Hugging Face embeddings, Google Gemini and Groq with fallback processing.
- Integrated Razorpay payment processing, Twilio OTP verification and dynamic pricing using PL/SQL and DBMS_SCHEDUL

GitHub: github.com/Dushmanta42310/AOS–Airline-Operation-Suite

Medco Emergency SOS | Flask, Oracle, Python, JavaScript *Sep 2026*

- Developed a mobile-first emergency SOS application with a Flask REST API containing 10 endpoints across 4 Blueprints and an Oracle schema.
- Implemented shake-to-SOS activation, GPS-based nearest-ambulance selection using the Haversine distance algorithm and SOS state management.
- Implemented authentication, signed tokens, ownership checks and parameterized Oracle SQL.

GitHub: github.com/Dushmanta42310/medical-project

BSN Tile Shop | Flask, Oracle, Jinja2, JavaScript *Aug 2026*

- Developed a full-stack inventory, billing and analytics application with authentication, product catalogue, stock management and reporting.
- Developed Oracle aggregation queries using COUNT, SUM, GROUP BY, NVL, TO_CHAR and TRUNC for analytics.
- Implemented CSV import and export using Python csv and io modules.

GitHub: github.com/Dushmanta42310/BSN-Tile-shop

Ride Invoice Studio | Flask, Oracle, SQLite, Supabase, REST API *Jul 2026 – Aug 2026*

- Built a REST-based ride invoicing application with 12 endpoints for rides, travel logs, places, GPS timelines and analytics.
- Implemented a multi-database layer supporting Oracle, SQLite and Supabase and generated GST invoices with interactive route visualization.

GitHub: github.com/Dushmanta42310/Bill_Generator

Coffee Shop Sales Performance Dashboard | Power BI, DAX *Jul 2026*

- Developed 16 DAX measures covering KPI, time intelligence, ranking and dynamic-title analysis.
- Built an interactive sales dashboard with filtering, cross-filtering, search, reset controls and CSV export.

GitHub: github.com/Dushmanta42310/Sales-Performance-Dashboard

Personal Portfolio | HTML, CSS, JavaScript, PWA *May 2025 – Sep 2026*

- Designed and developed a responsive personal portfolio using HTML, CSS and JavaScript with AOS animations.
- Implemented Service Worker offline caching, installable PWA support and EmailJS contact functionality.

Portfolio: dushmanta42310.github.io/portfolio

College Content and Student Management System | Flask, Oracle, RBAC *Apr 2026*

- Developed a Flask and Oracle application with role-based dashboards for students and teachers.
- Implemented password hashing, secure file uploads, input validation and role-based authorization.

GitHub: github.com/Dushmanta42310/CMS

ProjectNephrology | Flask, PostgreSQL, psycopg2, Jinja2 *Oct 2025*

- Built a Flask and PostgreSQL web application with server-side rendering, keyword search and drug-detail routes.
- Configured deployment using a Procfile for PaaS hosting.

GitHub: github.com/Dushmanta42310/ProjectNephrology

Technical Skills

Languages: SQL, PL/SQL, Python, JavaScript, Java, HTML5, CSS3, Bash
Database: Oracle Database, RDBMS, Stored Procedures, Functions, Triggers, Sequences, Constraints, Indexes, PostgreSQL, SQLite, Supabase
Backend: Flask, Flask-CORS, Jinja2, REST APIs, python-oracledb, cx_Oracle, psycopg2, Authentication, Authorization
Frontend: JavaScript ES6+, HTML5, CSS3, Responsive Design, Flexbox, CSS Grid, Chart.js, Leaflet, PWA, Service Workers
Data & Analytics: Power BI, DAX, Power Query, Data Cleaning, Data Visualization, KPI Design
AI / RAG: LangChain, ChromaDB, Hugging Face Embeddings, Google Gemini, Groq, RAG, Prompt Engineering
Tools: Git, GitHub, GitHub Actions, Postman, VS Code, Oracle SQL Developer 21c, Oracle APEX

Certifications

SQL: A Practical Introduction for Querying Databases — Coursera
Verified Credential: BAZVV0F0QKUR

ThriNex — Internship Certificate
Credential ID: THX-JUN1926-585
